

01 April 2025

To: All Member Federations of FIPS-Mouche

Subject:

Electronic voting system for elections and changes to competition rules and statutes

FIPS-Mouche is making final preparations for its General Assembly to be held on Friday 25 April from 14.30 to 18.30, as part of the 2025 CIPS congress.

As announced in the mail dd 24 Feb 2025 members unable to attend the General Assembly in person will have the possibility to vote electronically thru our website or by proxy, the electronic vote prevailing. Instructions on how we intend to organise this will be published on our website. This website feature will be ready to go in time for the GA.

Electronic voting will be possible for the election of board positions, technical committee and Athletes Commission (nominations) and for the change proposals for the Statutes and the Competition Rules.

The electronic voting system is secret and reveals only who has voted but doesn't show the actual vote. Therefore, it should be clear that if your federation decides to vote electronically your delegate physically present at the GA will have no voting rights. He/she may hold a proxy for a member not present and hasn't voted electronically. The delegates of members that haven't voted electronically will be able to vote during the GA via secret ballot.

The electronic vote will be submitted thru our website by your federation's SPOC known to us. SPOC will be able to Login to our website using your credentials: SPOC email or federation acronym.

The electronic voting period is set from **1 April till 23 April**.

A YouTube instruction video will be available on our website going thru the step-by-step voting process.

Kind regards.

Stefan Allacker
