

Announcement on a website

Dear Member Federations,

following the conclusions of the FIPS-Mouche General Assembly 2019 in Kazakhstan, Board has been working intensively on further development of our website. Website, that has been introduced in 2019, was considered to be a main communication platform with you – our Members. All news will be primary published on the website, concurrently this information will be automatically posted on the FIPS-Mouche facebook page and additionally each Member Federation will be email notified with a link onto the original message. Having this system running we can deliver to you our news more promptly, systematically and last but not least without double update of our social media. The main notification recipients will be all SPOCs (single points of contacts) that were imported into the website (one contact a federation). All news were stored with a timestamps, timewise sorted, so that you can freely lookup for older records as well.

At our Board meeting we internally decided to collect all available historical results of FIPS-Mouche championships. The results of our homework you can find published on our website within a new section “Results” divided over the categories. Unfortunately we did not succeed to collect all records and therefore if you have in your federation archives some missing files, please feel free to send it to us (ideally a copy of the original results).

Many of you have for sure noticed that since a launch of the new website in 2019 the main domain was determined fips-mouche.net whereas fips-mouche.com was configured as a secondary one (due to some technical restrictions). As these restrictions are nowadays over the web designer did a migration and swapped the web domains - therefore same as in the past the main domain is fips-mouche.com. You can freely use further on both ones in your web browsers as they are referring to the same hosting. Due to a higher security we have also introduced a SSL protocol.

We strongly hope that this newer version of a website will help in our communication, attractive presentation of our business and above all hopefully you will like and enjoy it. Please let us know your feedbacks. Thank you.

Best wishes

Mario Podmanik
